DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The amendments to pages 7, 15, 18, 23 are inconsistent with the lines .

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 30-48 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 30, it is not clear what are the respective lines that bisect the cutting edges. It is not clear whether the outer peripheral contour is of the planar front side or planar backside of the knife.

Regarding claim 42, it is not clear whether the outer peripheral contour is of the planar front side or planar backside of the knife.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30-35, 38 and 39 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Wagstaff (US Patent 5,779,167).

The device of Wagstaff reads on the elements of the claimed invention including at least two spaced apart concavely curvilinear cutting edges (13, fig. 12 and 13). The Examiner takes the position that the attack relief angle is in the range of 25-40 degrees and the attack relief angle is constant over the beveled face. Further, the Examiner takes the position that the defined alignment angle of relief between the line and outer perimeter portion are at least about 20 degrees.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30-35, 38 and 39 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Wagstaff.

In event Applicant disagrees with the above rejection, it would have been obvious to one having ordinary skill in the art to provide a constant attack relief angle in the range of 25-40 degrees and an alignment angle of the relief between the line and outer perimeter portion are at least about 20 degrees for the purpose of enhancing the efficiency of the knife.

Claims 36, 37, 40 and 42-48 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Wagstaff.

Wagstaff teaches most of the elements of the claimed invention except for "n" cutting edges greater than 2 and four spaced apart semi-circular cutting edges. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a knife having four spaced apart concave semi-circular cutting for the purpose of enhancing the efficiency of the knife. Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the cutting edges greater than 2 and four spaced apart semi-circular cutting edges of the knife of Wagstaff, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

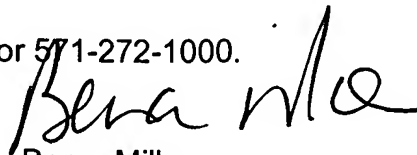

Art Unit: 3725

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
